SUMMARY

A skilled frontend developer and a robust skill set in HTML, CSS, and JavaScript. With hands-on experience in designing and developing the frontend of websites, I bring creativity and technical proficiency to deliver engaging user experiences.

Indepth knowledge of software development life cycle from requirement analysis to deployment and maintainence .

Strong problem-solving skills and solid grasp of computer fundamentals enable me to approach technical challenges with confidence and precision.

Excellent communication skills, combined with natural leadership qualities, allow me to collaborate seamlessly with cross-functional teams.

Passionate about staying updated with the latest industry trends and emerging technologies and constantly enhancing skills through self learning and professional development .

PROJECTS

Weather App

Designed, developed a weather application using HTML, CSS, JavaScript and Open Weather API

Easily interpretable weather data, including temperature, humidity, wind speed .

Integrated OpenWeather API to gather precise meteorological data and use forecasting algorithms ensuring reliable and up to date information about weather.

Calculator

Developed a robust and user friendly calculator using HTML, CSS, JavaScript to create a tool for mathematical calculations.

Designed and integrated different mathematical tools and operators .

Precise and consistent calculations by implementing error handling .

Certifications

- Certificate course on cloud by ICT Academey (Pursuing)
- DSA with Java by Apna College (Pursuing)

TECHNICAL SKILLS

- **Web Development** : HTML , CSS , BootStrap , Javascript , API , Git and Github
- **JAVA** : OOPS, Data Structures , Algorithms
- **Database** : MySql
